## UTILITY LOCATING SYSTEM

The Subsite® UtiliGuard Utility Locating System has accuracy-enhancing features you can't get on other locators. Ambient Interference Measurement (AIM®) technology automatically recommends the best frequency. An available 12-watt transmitter drives signals farther down large, direct-buried utilities. And only the UtiliGuard locating system can provide the depth and horizontal distance to the utility. Don't take a risk on anything else. Get the UtiliGuard locating system.

### KEY FEATURES

- ⌘ High-contrast LCD display is visible in all conditions, including direct sunlight.
- ⌘ Remotely control the transmitter with the receiver. (+)
- ⌘ Provides horizontal and vertical distance (depth) to the utility to enable users to make accurate locates of obstructed utilities. (+)
- ⌘ Bluetooth® technology simplifies communication and data transfer to GPS devices. (+, S)
- ⌘ UtiliGuard is direction enabled, i.e., provides the direction of the current to help you identify the target line. (+, S)
- ⌘ AIM® scans the surrounding area for noise and recommends the best frequencies for the fastest, most accurate locates. (+)
- ⌘ Dual-output transmitter connects to two utilities at once, reducing the time required to locate multiple services. (+)
- ⌘ Ability to change the frequency and power level from the receiver and switch leads between utilities when using dual output. (+)
- ⌘ 12-watt transmitter drives signals farther down large, direct-buried utilities. (+, S)
- ⌘ Intuitive operator interface is easy to learn and use, and includes multiple languages. (+, S, B)
- ⌘ Superior battery life: transmitter 100+ hours (max), receiver 30 hours (max); more than twice as long as the competition's. (+, S, B)
- ⌘ Ruggedly built UtiliGuard has an industry-best IP65 rating to ensure excellent performance in dusty, dirty or wet jobsite conditions. (+, S, B)
- ⌘ Choose from 70 standard frequencies via user-configurable software. (+, S)
